**Coordination of Land Mobile Systems in Sweden with
Broadcasting Service in Estonia in 694-790 MHz**

Dear Sir / Madam,

The Estonian Technical Regulatory Authority has decided to end the Broadcasting Service in 694-790 MHz not later than 30.06.2017.

We agree that there is no need to coordinate Land Mobile System in Sweden with Broadcasting Services in Estonia in 694-790 MHz if the current assumptions for Land Mobile System network emission will not increase.

Yours sincerely,

Alo Einla
Head of Frequency
Management Department
